

## Catania's Fontanarossa airport

### Landing at Catania

Catania airport is one of the busiest in Italy but small and easy to get around. The arrivals are on the lower floor whilst departures are on the first floor. While you are waiting for your bags, we strongly suggest that one member of the group goes off to pick up the hire car. The hire car companies are located across the road in front of the arrivals hall. Most of the companies are in the same office so big queues build up quickly which each new flight.
